

To: A&M Contractors Inc.

With much appreciation I write this letter to you (Abed and Yousef), yourselves and your team make working in the construction of (Earthwork, Concrete & Utility) easy and almost effortless for General Contractors like us.

We have worked on numerous projects together over the past three years and each one your team has been a part of has been a success with a portion of that success coming from the team work that you contributed to the project team at each location. The professionalism of the office staff (Karen) and your team leaders in the field have and do a great job of keeping the task of each project moving quickly and in the right direction for everyone involved. Attention to detail in the field and knowing the schedule is a great asset of your field team, from City and State requirements for utilities along with meeting all earthwork and concrete requirements set forth in the contract documents as well as expected requirements from City and State municipalities help keep the RFI process to a minimum.

We here at EBCO General Contractors look forward to working with you and your team again in the near future and know that we will again be successful with any project that your company is part of our team.

Thank you,

A handwritten signature in black ink, appearing to read 'Chris Bush', is written over a light blue horizontal line.
